

Dear sirs:

RM-10868 offers a very disturbing suggested change; a change for the worse and one that has already been tried in the past and disposed of due to the inability to evenly apply the standard.

I refer to the suggestion the current amateur radio question pools be scrapped and new question pools be devised and NOT PUBLISHED. THIS DID NOT WORK IN THE PAST. There is no reason to think certain people would still be able to gain access to the "secret" question pool, giving them and those they would share this information with a totally unfair advantage to everyone else in this country wishing to take an amateur radio license exam.

Please, do NOT enact any of the suggestions found in this document. I do not like their other suggested changes, but have only mentioned the one I find most disturbing to keep this comment brief.

I do support the ARRL's suggestions (RM-10867).

Sincere regards,  
Erik Weaver
